

Leading International Dating App Adds Email Function to Make International Online Dating More Convenient and Seamless

AnastasiaDate Launches Updated Version of its Successful Mobile App, Including Instant Email Access

New York, NY / Moscow, Russia – August 6, 2013 – [AnastasiaDate](#), an international dating service that connects American men with women across the globe, announced the launch of a new email feature within the company's popular mobile app to help men, when they are on the go, connect with their love interests overseas more seamlessly. This new feature supports the company's ongoing commitment to using technology to foster love and relationships across borders.

One impetus for this upgrade was to respond to customer feedback and requests for this email feature.

"Since we launched the app almost six months ago, we've received great feedback from users who are engaging with their matches on it. At AnastasiaDate, we are committed to our members and always take their comments about the site and the app to heart," said Lawrence Cervantes, Chief Communications Officer at AnastasiaDate. "When we received multiple requests for adding an email feature to the app, we listened, and today are pleased to present the new version to our users."

The app is currently available as a [free download](#) for Android devices on Google Play. As with AnastasiaDate's online service, members can use the app to connect with interesting and intriguing women internationally as a new and exciting alternative to the local dating pool.

The updated version of the app will also feature many elements of the original version of the app that made it so popular, including the ability to browse profiles, photos and interviews, engage in live text chat, maintain a contact list with preferred matches, purchase credits, receive VIP status notifications, and video chat with matches using the CamShare function. Additional information on the mobile app and a complete list of features can be found on the AnastasiaDate's [mobile app page on Google Play](#).

Since January, 2011, AnastasiaDate.com has seen a 47 percent increase in members accessing the site from mobile devices. As online dating continues to grow in popularity, AnastasiaDate's millions of users can download the app and use their current login details to access their accounts from Android devices. New users who are 18 years of age and older can use the app to create an account and start introducing themselves to women across the globe.
